Hyderabad Sindh Pakistan

I'm a versatile Full Stack Developer with a strong foundation in React and the MERN (MongoDB, Express, React, Node.js) stack. Beyond MERN, my expertise extends to various other frameworks and libraries, showcasing my adaptability in web development. Specializing in crafting dynamic and responsive user interfaces, I seamlessly integrate them with robust back-end systems, ensuring scalable and maintainable web applications. With a blend of creativity and technical prowess, I bring an attractive starting point to any development team.

TOOLS AND TECHNOLOGIES

Programming Languages : JavaScript, HTML/CSS

Frameworks/libs/tools : Nextjs, React, GraphQL, Redux-Toolkit, Typescript, React-Query, tailwind, Git, Vs-code

PROFESSIONAL EXPERIENCE

Techriv Solutions (Pvt) LTD   **Nov 2023 - Present**
MERN Stack Developer
Designed, enhanced, and modified over 25 software systems and custom components. Created 30+ new software solutions through performance analysis. Investigated 100% of problem areas, analyzing systems flow, data usage, and work processes. Integrated existing software into 13 upgraded systems for expanded performance.

Upwork · Freelance   **May 2021 - Present**
Full Stack MERN Developer
Implemented industry-standard security practices in code. Crafted 200+ unit tests for UI, back-end, and DB functionality. Supported 8+ systems as Tier 2, managing break-fix and data alterations.

HSN Design Studio   **Jan 2023 - Oct 2023**
Junior React Developer
In my role as a Junior React Developer at HSN Design Studio, I embarked on an exhilarating journey, sculpting immersive, user-friendly interfaces. Collaborating with a dynamic team, I acquired invaluable hands-on experience, actively contributing to impactful client projects, refining my expertise, and continuously pushing the boundaries of web development.
